Aims and Scope. JAMES publishes research related to a wide range of problems in climate science, including atmospheric and oceanic circulations on multiple scales; radiation, cloud physics, boundary layer, and land surface processes; the biosphere and cryosphere; biogeochemical cycles; and the development of numerical methods, model parameterizations, and data assimilation methods for Earth systems modeling.

Editors: Robert Pincus (Editor in Chief), Robert.Pincus@colorado.edu; development of numerical methods, model parameterizations, and data assimilation methods for Earth systems modeling.

Associate Editors: Cecilia Bitz, Annalisa Bracco, Chris Bretherton, Peter Caldwell, Yongjiu Dai, Juliana Dias, Tijana Janjić, Patrick Laloyaux, Sonya Legg, Florian Lemarie, Thorsten Mauritsen, Sophie Nowicki, Andreas Oschlies, Wei Ren, Hui Wan, Kei Yoshimura

AGU Editorial Team. For submission with submitted manuscripts, file specifications, or AGU publication policy please contact james@agu.org.

For submission instructions or to submit a manuscript visit: http://james-submit.agu.org/cgi-bin/main.plex.

The journal to which you are submitting your manuscript employs a plagiarism detection system. By submitting your manuscript to this journal you accept that your manuscript may be screened for plagiarism against previously published works.

JAMES accepts articles for Open Access publication. Please visit http://olabout.wiley.com/WileyCDA/Section/id-406241.html for further information about OnlineOpen.

Publication Charges. The publication charge income received for JAMES helps support rapid publication, allows more articles per volume, makes possible the low subscription rates, and supports many of AGU's scientific and outreach activities. Publication charge information can be found here: http://publications.agu.org/author-resource-center/publication-fees.

To encourage papers to be written in a concise fashion, there is an excess length fee. For JAMES the fee is assessed only on the equivalent of more than 25 publication units. The excess length fee does not apply to review articles, and the editor may waive the fee on a limited number of concisely written papers that merit being longer. There is no charge for color in any format.

Open Access and Copyright. All JAMES articles are published under a Creative Commons License. All Research Councils UK (RCUK) and Wellcome Trust funded authors will be directed to the Creative Commons Attribution license (CC BY) in accordance with funder mandates effective on 1 April 2013. All other authors (non-RCUK and Wellcome Trust authors) will be directed to the Creative Commons Attribution-Non-Commercial-NoDerivs (CC BY NC ND). Copyright on any research article published by JAMES is retained by the author(s). Authors grant the Publisher a license to publish the article. Authors also grant any third party the right to use the article freely as long as its integrity is maintained and its original authors, citation details and publisher are identified, and the use is non-commercial. Further information about open access license and copyright can be found at: http://www.wileyopenaccess.com/details/content/12f25db4c87/Copyright-License.html
