Aims and Scope. Space Weather: The International Journal of Research and Applications is devoted to understanding and forecasting space weather. The scope of understanding and forecasting includes: origins, propagation and interactions of solar-produced processes within geospace; interactions in Earth’s space-atmosphere interface region produced by disturbances from above and below; influences of cosmic rays on humans, hardware and signals; and comparisons of the types of interactions and influences with the atmospheres of neighboring planets and Earth’s moon. Manuscripts should emphasize impacts on technical systems including telecommunications, transportation, electric power, satellite navigation, space exploration, spacecraft design and operations, human spaceflight, and other systems. Manuscripts that describe models or space environment climatology should clearly state how the results can be applied.

Papers include original research articles, as well as feature articles and commentary. Space Weather is a research resource that also provides news and information for space weather professionals.

Editors: Delores J. Knipp (Editor in Chief) (http://orcid.org/0000-0002-2047-5754), Barbara Giles, Michael Hapgood, Lou Lanzerotti, Howard Singer.

AGU Editorial Team. For assistance with submitted manuscripts, file specifications, or AGU publication policy please contact spaceweather@agu.org.

For submission instructions or to submit a manuscript visit: http://spaceweather-submit.agu.org/

The journal to which you are submitting your manuscript employs a plagiarism detection system. By submitting your manuscript to this journal you accept that your manuscript may be screened for plagiarism against previously published works.

Publication Charges. The publication charge income received for Space Weather helps support rapid publication, allows more articles per volume, makes possible the low subscription rates, and supports many of AGU’s scientific and outreach activities. Publication charge information can be found here: http://publications.agu.org/author-resource-center/author-guide/publication-fees.

To encourage papers to be written in a concise fashion, there is an excess length fee. For Space Weather the fee is assessed only on the equivalent of more than 25 publication units. The excess length fee does not apply to review articles, and the editor may waive the fee on a limited number of concisely written papers that merit being longer. There is no charge for color in any format.

Copyright and Copying. Copyright © 2015. American Geophysical Union. All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. Authorization to copy items for internal and personal use is granted by the copyright holder for libraries and other users registered with their local Reproduction Rights Organization (RRO), e.g. Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923, USA (www.copyright.com), provided the appropriate fee is paid directly to the RRO. This consent does not extend to other kinds of copying such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale. Special requests should be addressed to: publications@agu.org.

Disclaimer. The Publisher, American Geophysical Union, and Editors cannot be held responsible for errors or any consequences arising from the use of information contained in this journal; the views and opinions expressed do not necessarily reflect those of the Publisher, American Geophysical Union, and Editors, neither does the publication of advertisements constitute any endorsement by the Publisher, American Geophysical Union, and Editors of the products advertised.

Individual Subscriptions. Member subscriptions are available through members.agu.org or by contacting the AGU Member Service Center. The Service Center is open from 8:00 a.m. to 6:00 p.m. Eastern time: +1 202 462 6900, +1 800 966 2481; Fax: +1 202 328 0566; e-mail: service@agu.org. Questions about meetings or membership will be referred to the appropriate staff.

Publisher. Space Weather is published on behalf of the American Geophysical Union by Wiley Periodicals, Inc., 111 River St., Hoboken, NJ, 07030-5774, +1 201 748 6000.

Journal Customer Services. For institutional subscription information, claims and any enquiry concerning your journal subscription please go to www.wileyonlinelibrary.com/ask or contact your nearest office.
